## Features

- Non glare protective front
- Sturdy, stylish low profile frame
- Mounts using concealed hardware
- Changeable graphics

**Model EM1212**

## General Description

The Graphic Evacuation Map consists of color-coded artwork sandwiched between a 1/8" clear non-glare front color and a 1/8" white acrylic backup sheet. The assembly is housed in a sturdy brushed aluminum frame and is attached to the wall with vandal resistant hidden hardware.

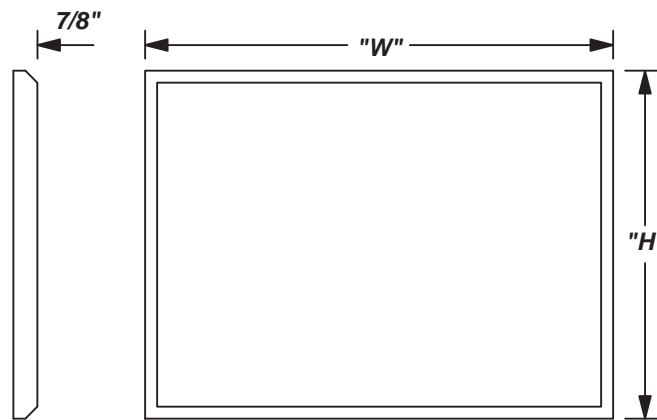

Should the building floor plans or evacuation route be changed, the artwork can be extracted and modified, or replaced to match the new requirements without replacing the entire assembly.

## Ordering Information

A drawing is required showing the actual graphic representation needed for your project. Mark the Map location on the plans so that the artwork can be oriented properly with a "You Are Here" designation.

Graphic sizes are shown below, according to model number. The maximum area available for artwork is the outside dimension, less two inches. We will work from your blueline, copy, fax, sketch, email or CAD file. Please note: a full

Graphic Door

<b>MODEL</b>	<b>WIDTH x HEIGHT</b>
